A Prescription for
Change

Use your Pharmacy background to help improve the health of communities, not just individuals. Epic software lets pharmacists focus on providing improved treatment and reducing medical errors instead of administrative tasks.

As a member of the Clinical Informatics Team you'll use your knowledge to act as a liaison between pharmacists and the Epic team and demonstrate how Epic software improves medical outcomes.

An acute care background is preferred, though others are encouraged to apply. Successful candidates must have a BS in Pharmacy or PharmD and be familiar with pharmacy workflows. Positions require relocation to Madison, WI and offer a chance to travel 50% nationwide.
Apply online or send your resume and cover letter to:
